Invest in the Future of Cinematic Nightlife

Roy Webb Productions presents Bizarre Rave - an immersive 360° dance experience inside underused cinema auditoriums. With AI-powered visuals, real DJs, and 5D sound, we turn dormant space into standing-room revenue.

The Problem

Gen Z and Millennials are skipping theaters.

Streaming dominates.

Thousands of 70-80 seat auditoriums sit empty every week.

The Solution

- Patented 360° projection system + AI-generated visuals
- Real DJs, 5D audio, and standing dance floors
- 6 shows per weekend (Fri/Sat at 8PM, 10PM, 12AM)
- \$9,000+ gross revenue potential per venue, per night

No construction. No interference with standard cinema operations.

The Market Opportunity

- 40,000+ cinema screens in North America
- Thousands of small auditoriums going unused
- Gen Z demands immersive real-world experiences

We use the space multiplexes already have to generate new revenue.

How It Works

- 50/50 revenue share with theaters (after local ops)
- RWP provides content, tech, app, DJs, and audience
- Shows added to a licensable global content library
- No impact to weekday movie operations

The Technology

- Patented 5D projection + 360° AI visuals
- Sora, Runway, Midjourney, ElevenLabs
- Built for real-time audience input + scale

The App

- Vote on music, visuals, and DJs
- Submit tracks and suggest artists
- Connect with friends and grow the community

The app drives engagement, retention, and virality.

Proof of Concept

- CTO hired (30+ yrs experience)
- App interface in progress
- DJ licensing + rollout ready
- Social platforms secured

Why Now

- Cinemas need new revenue streams
- AI makes stunning visuals fast and affordable
- Gen Z craves interactive IRL experiences
- Bizarre Rave is ready to scale

The Ask

Seeking angel investment to fund:

- Proof-of-concept venues
- App/content development
- National rollout

Goal: 2-3 exclusive locations per metro area
